
the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The United Nations World Food Programme (WFP) has been instrumental in this regard, and has been successful in increasing the number of people who are receiving food aid from 100 million in 1980 to 150 million in 1995 (WFP 1996).

One of the main reasons for the increase in the number of people who are undernourished is the increase in the number of people who are living in poverty. The number of people who are living on less than \$1 a day has increased from 1 billion in 1980 to 1.5 billion in 1995 (WFP 1996).

There are a number of factors that contribute to the increase in the number of people who are living in poverty. One of the main factors is the increase in the number of people who are living in rural areas. The number of people who are living in rural areas has increased from 1 billion in 1980 to 1.5 billion in 1995 (WFP 1996).

Another factor is the increase in the number of people who are living in urban areas. The number of people who are living in urban areas has increased from 1 billion in 1980 to 1.5 billion in 1995 (WFP 1996).
